November 16, 2017

Dear Mr. McCorquodale,

On behalf of the UAB Comprehensive Cancer Center and its Young Supporters Board, we would like to thank you McCorquodale Transfer for sponsoring our 2017 Fiesta Ball at the Fiesta level. With your help, we raised over \$100,000 to support the Mary Ann Harvard Young Investigator Award, a competitive grant that funds young scientists conducting cancer research at UAB.

Here at the UAB Comprehensive Cancer Center, our daily work is focused on one vision – to eliminate cancer as a major public health problem. We are making tremendous strides in developing new and better avenues to provide the highest quality of life for people diagnosed with cancer, while advancing the possibilities for prevention, detection, treatment and survivorship.

Our young scientists play an extremely important role in the future of cancer treatment and patient care. With adequate funding, young scientists can generate data that may be used to apply for larger federal grants. Funding for young scientists in particular is scarce, but these bright minds will be the ones to make groundbreaking discoveries that will improve treatment options and save lives. **Supporting young cancer researchers is an investment in their future and in ours!**

We appreciate your support of our Fiesta Ball in the past and sincerely hope that McCorquodale Transfer will continue to invest in life-saving research by partnering with us again this year. The 2018 Fiesta Ball will take place on May 4, 2018 at Haven. Enclosed you will find additional information regarding sponsorship levels and benefits. We appreciate your thought and consideration.

Thank you for partnering with us in our progress.
Sincerely,

Michael J. Birrer, M.D.
